

# Lifecycle services

# From essential support to lifecycle optimisation

Auramarine's mission is to ensure the operational efficiency of your fuel supply system throughout its lifetime. We are by your side from design and delivery to regular maintenance and the latest retrofits and modernisation solutions once in service.

Every aspect of a ship's fuel supply system is crucial for maximising its operational efficiency and combustion system health.

The technical integrity of this system, achieved through diligent planning and preparation, helps keep your operational risks and costs at the lowest possible levels. It also ensures that your fuel system meets its intended requirements under pre-defined operating conditions.

## **Auramarine aftersales services:**

- essential installation support for fuel supply unit
- commissioning fuel supply system
- inspections and preventative maintenance
- on demand maintenance and repairs
- rapid, worldwide delivery of high-quality spare parts
- spare parts kits for planned maintenance
- fuel supply performance optimisation
- upgrades, modernisations and retrofits
- training

**World-leading shipyards, engine manufacturers, shipowners and operators choose Auramarine products and services.**

## Spares availability

The rapid, global availability of fuel system spares for the right price is essential. Auramarine offers a range of flexible options for simple and efficient spare parts administration:

### On demand spare parts delivery

Original spare parts are guaranteed to perfectly fit your equipment and ensure peak performance. Scheduling can be critical; therefore we only use long-term trusted logistics partners.

### Customised spare part kits for proactive maintenance

Our customised spare parts kits can be tailored to match your requirements and help you maintain an optimal wear parts inventory at all times. This solution is based on specialist software, which intelligently suggests a tailor-made spare parts kit for your particular fuel supply system; no more, no less. You can subscribe to receive an up-to-date, regular free-of-charge suggested wear parts list for your ship or fleet. If adopted, this software-based solution pays off through minimised fuel system downtime and smooth spares administration.

### Modernisation packages

Auramarine's fuel supply units are renowned for their durability and long service life. Later on in their lifecycle, you can upgrade your equipment to maintain its peak performance. This could typically include cooler/heater installations, automation advances or fuel change-over solutions. Upgrade packages improve system longevity, reliability, fuel efficiency, engine performance and environmental protection. They can be delivered in parts or as modular solutions, with or without installation services.

## Global spares and maintenance support

Auramarine spare parts, aftersales services and technical support are globally available through our main hubs in Finland, Shanghai and Hong Kong. **A global representative network is at your service in over 25 countries.**

## Service and maintenance calls

Auramarine service engineers are experienced and service-minded, and available globally at short notice. If necessary, they can also recommend any further steps that could be taken to improve your fuel system's operational efficiency.

## Trainings

Auramarine service training ensures that engine-room personnel are familiar with equipment features and their proper use, and that proactive maintenance is correctly carried out at the right time.

## A whole company at your service

Auramarine is known for its expertise and response to customer needs. We believe in collaboration with customers, with suppliers and authorities, and within our company. This enables high-quality, technically-precise pre-investigations for dockings, accurate component identification, rapid production of technical drawings, 3D-design to define elements such as space requirements for retrofits, well-proven system testing, adjusting and programming procedures and seamless logistics. Our work specifications are clear, which means a smooth and cost-efficient process for all parties.

**Auramarine is your trusted fuel systems expert for the marine and power industries. Our proud heritage stems from the company's foundation in Finland in the early 1970s. Since then we have delivered over 14,500 robust and reliable auxiliary systems to our customers all over the world, continuously aiming for superior service and customer value.**
